YASH PATIL

Data Analyst

patilyash8398@gmail.com | +91 9527025464 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Analytical Data Analyst with experience in large-scale data processing, data quality validation, reporting automation, and visualization. Proficient in Excel, SQL, Python, Power BI, and Tableau, with hands-on experience transforming complex datasets into structured, actionable insights. Experienced in identifying data discrepancies and developing automated reporting workflows to support data-driven decision-making.

TECHNICAL SKILLS

Reporting & Visualization: Microsoft Excel, Power BI, Tableau, Dashboard Development, Data Visualization
Data Analysis: Data Cleaning, Data Validation, Data Quality Checks, Exploratory Data Analysis, Trend Analysis, Statistical Analysis
Programming & Querying: Python, SQL, R, Pandas
Databases: MS SQL Server, MySQL, MongoDB
Machine Learning: Predictive Modeling, Model Evaluation, Feature Engineering

PROFESSIONAL EXPERIENCE

Data Analyst Intern | ProNeta, Pune | July 2026 – Present

- Processed and analyzed 5.5+ lakh electoral records using Python and Pandas to identify self-matches and relative matches across historical and current datasets.
- Performed data cleaning, standardization, validation, and rule-based matching to identify discrepancies and improve data consistency and reliability.
- Extracted and consolidated data from PDF, Excel, CSV, and JSON sources into structured datasets for reporting, analysis, and website integration.
- Developed and automated recurring data-processing and visualization workflows using Python, Pandas, Excel, and Matplotlib, improving reporting efficiency and consistency.
- Built constituency-level reports and visualizations to analyze party-wise vote shares, candidate performance, and election trends across multiple states and years.
- Validated and maintained structured records in MongoDB and JSON/BSON collections, checking data completeness, accuracy, and consistency across election datasets.
- Automated web-based polling station data extraction and consolidated station-level records into Excel workbooks to support data collection and validation.

PROJECTS

Credit Card Report (Power BI, SQL)

- Built two interactive Power BI dashboards (Transaction and Customer Reports) analyzing $57M revenue and 667K transactions across card categories, expenditure types, and customer segments.
- Used SQL queries to identify key insights: Bills ($14M) as the top spending category, Blue card holders contributing 83% of revenue ($47M), and Q4 as the peak transaction quarter (173.2K transactions).

Loan Approval Prediction (Machine Learning)

- Compared seven models; tuned Gradient Boosting achieved 89% accuracy, 100% recall, and a 0.93 F1-score.
- Deployed a Streamlit web app for real-time loan approval prediction based on applicant financial profiles.

EDUCATION

PG Program in Data Science | Edu Plus Institute, Pune | October 2022 – August 2023 | CGPA: 8.2/10

B.E. in Electronics and Telecommunication Engineering | Finolex Academy of Management and Technology, Ratnagiri | 2017 – 2020

CERTIFICATIONS

Google Data Analytics (Coursera, 2023) | SQL Intermediate (HackerRank, 2023) | Statistics for Data Science (Great Learning, 2023) | Machine Learning Algorithms (Simplilearn, 2023) | TCS NPT Machine Learning Pro (2024)

EXTRACURRICULAR ACTIVITIES

- Competed in National-level Karate Championships, earning multiple medals.
- Represented district in cricket; awarded “Best Batsman” in college competition.
